

## **Literature Projects**

### Kurt Borgne

? : Detection of neutrinos from SNe (I)

? : Use of AGB stars/Planetary Nebulae in extragalactic studies (II)

### Mats Fjellström

May 14: What have we learned from SN 1987A? (I)

June 16: Planet formation scenarios (III)

### Martina Friedrich

May 21: s-process in AGB stars (II)

June 16: First stars (III)

### Per Gröningsson

June 9: Type II<sub>in</sub> SNe (I)

### Vasco Henriques

May 14: X-rays from SNRs (I)

June 16: The role of turbulence in star-forming clouds (III)

### Andrej Kuutmann

May 21: Dust Formation around AGB stars (II)

June 16: Dust/Gas disk evolution (III)

### Martin Lindman

May 21: Born-again AGB stars (II)

June 9: The progenitors of GRBs (I)

### Christoffer Lundman

May 14: Large scale instabilities in the core collapse (the SASI mechanism) (I)

June 16: The structure of interstellar clouds (III)

### Magnus Persson

May 21: Thermal pulses (II)

June 16: Outflows and jets in star formation (III)

### Jaime de la Cruz

May 21: AGB stars in Binaries (II)
